

Single Brush Holder Assembly

- ◆ **Part Number: W61074942A**

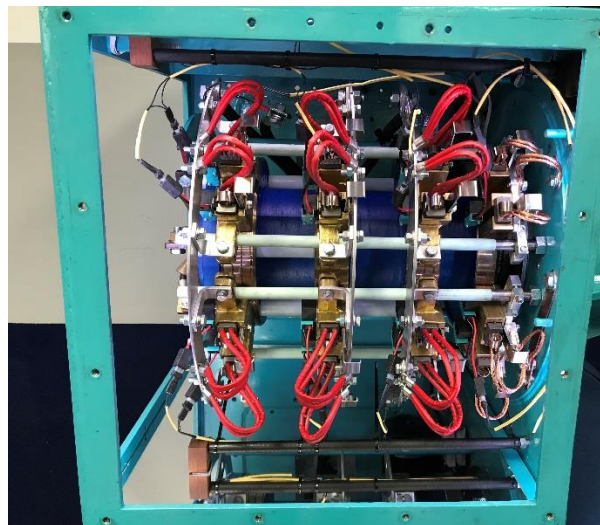

Benefits :

- ◆ Bolt on replacement of existing holders.
- ◆ Fast Easy Installation
- ◆ Constant force springs
- ◆ SRS machining brushes are available to improve ring roundness and surface finish.

Features:

- ◆ The application is for GE 1.5MW to 1.85MW turbines with Hitachi style generators.
- ◆ Fits Hitachi generators with 270 mm OD Slip ring.
- ◆ Brush Spring included.
- ◆ Brushes sold separately. Part number W61050365LG.

- This brush holder is a direct replacement for the OEM phase brush holder.
- The same brush and spring are used in this holder as in the OEM.
- Micro-switches are more robust, readily available, and easy to replace if needed.
- This holder plugs into the existing yellow wiring harness. (See installed holders below)
